Maths Week

Today, we went on a walk around the school grounds to see what maths we could find. We found clocks to tell the time on the walls and counted the number of trees we passed. We also noticed the picnic benches had 4 legs so we worked out how many legs the 4 picnic benches had altogether. We thought about the maths that was involved in building the playground and the school itself. While moving round school we counted in 2s, 5s and 10s at different points when walking.

Number Bonds to 10

Number Bonds to 20

Time

Odd and Even Numbers

Shapes

Counting in 2s, 5s and 10s

We then collected natural items and entered them in a grid. Each row and column had to add together to equal 10.
